PLAN 1:2

SECTION A–A 2:1

(its part from r 46 to 66)

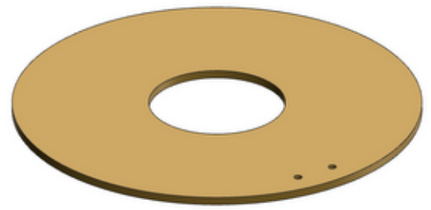

NOTES

1 The two Ø6 holes pass the cross nets l1 and r1 (deck A's junctions; deck B's sit over them).
2 Bonded on the can; the parts' face is the outer (+|z|) face.
3 G10 machined across the laminate where the drawing shows faces normal to z; seal every cut edge with low-viscosity epoxy (tracking along exposed fibres, presets/hub-locked.json shaft_coupler).
4 General tolerances ISO 2768-mK; dimensions in mm; do not scale. Views by hidden-line removal of the model's solids.
